

Floating

Some clouds can be so close to the ground they are like fog.

What can you see that is floating?
Where is it going and where is it from?

What can you see?

Studying clouds is called NEPHROLOGY

Clouds can travel faster than 100 miles an hour.

As High as
the HEAVENS
are Above the
EARTH,
so GREAT is
the FATHER'S
LOVE FOR Those
who Fear Him
Psalms 103:11

Can you lie really still and imagine you are floating?
How does it feel?

I wonder if you could float anywhere
where would you go?

Have you ever watched the stars at night?
